

Individual Outcomes

This document will support you in identifying and setting goals in order to help you achieve your desired wishes and outcomes.

Everyone has the right to make choices and decisions about

- where they live
- their health care
- their personal finances
- interests/social activities
- if they would like the support of an advocate

We will work with you or your advocate to build your plan, and then review it regularly to ensure we support you in achieving everything that is important to you.

Your plan will be person-centred, and will capture your goals, beliefs and interests. If you need assistance in setting your plan, a family member or advocate can assist.

Unfortunately, our staff are unable to support in this particular instance and must remain impartial.

Your plan can be changed at any time if you are not happy with it, or if you think of new ideas or goals you would like to pursue.
